BETTER HEALTH + BETTER NUTRITION + BETTER POLICING + BETTER BUDGETS

The Marijuana HEMP Party has a plan to integrate the whole plant into our everyday lives for medicine, food security, the environment and social harmony.

**FOOD** better protein than beef

**FUEL** cleaner energy than crude oil

**FIBRE** stronger textile than cotton

**MEDICINE** safer effect than pharmaceuticals

**RECREATION** healthier choice than alcohol

Cannabis as medicine and therapy could reinvent the health system.

Currently we waste millions of tax-payer dollars trying to enforce prohibition.

Complete protein and polyunsaturated fats are an essential part of our diet.

A regulated market would redirect funding to education, health and harm reduction.

The hemp plant can address environmental concerns on CO<sup>2</sup> levels and soil reparation.
